A user should be able to read an individual Item	Items	 	HOB-5
A user should be able to update an Item	Items	 	HOB-6
A user should be able to delete an Item	Items	 	HOB-7
A user should be able to create a Hero	Heros	 	HOB-8

BACKLOG 12			
Epic for all Item related tasks	Items	 	HOB-1
Epic for Hero related tasks	Heros	 	HOB-2
A user should be able to create an Item	Items	 	HOB-3
A user should be able to read all Items	Items	 	HOB-4

A user should be able to read all Heros	Heros	 	HOB-9
A user should be able to read an individual Hero	Heros	 	HOB-10
A user should be able to update a Hero	Heros	 	HOB-11
A user should be able to delete a Hero	Heros	 	HOB-12

# Testing

Unable to complete testing

# Sprints

Make sure I understand the scope of each sprint and how long it would take to complete one of many

Allocate designated times to complete sprints and in correct order of importance to the sprints and overall project

# In Conclusion

- Have a better plan and risk assesment that could have helped with overestimating the scale of the project, which lead to missing and unfinished objectives.
- Manage time better and to better know the scale made from large numbers of ideas, with bad judgment of time cost
- Fix front end errors, to allow use of the application through a webpage and not just postman

# Thanks

- Demo (in Postman)
